PROFILE

Experienced **UI Designer & UI Developer** with a strong blend of creative design expertise and hands-on front-end development skills. Proficient in wireframing, UI/UX design, prototyping, and developing responsive, theme-based web applications, websites, ad banners, and emailers. Adept at translating user-centered design concepts into high-quality, accessible, and performance-optimized interfaces while ensuring adherence to web standards, usability principles, and cross-browser compatibility.

ROLES AND RESPONSIBILITY:

- Lead UI/UX design initiatives including user research, wireframing, visual design, and interactive prototyping to define intuitive and engaging user experiences aligned with business goals.
- Architect and develop reusable UI components and theme-based, responsive, and accessible (WCAG & WAI) web applications following W3C standards and best front-end practices.
- Own UI technical decisions, enforce coding standards, conduct in-depth code reviews, and ensure performance, accessibility, and cross-browser compatibility across all deliverables.
- Lead and mentor junior developers and designers by planning tasks, setting goals and timelines, resolving technical and design challenges, and ensuring successful project delivery.
- Collaborate with product owners, stakeholders, and cross-functional teams to define requirements, estimate efforts, manage priorities, and drive continuous UI improvements.
- Research, evaluate, and implement new design tools, front-end technologies, and processes to improve team efficiency, code quality, and overall user experience.

PROJECTS

- **Design System and UI Kit (07/2025 – Current)**
  For all AkzoNobel internal applications, designed and developed a scalable design system with reusable components and well-defined guidelines, ensuring consistent user experiences and enabling teams to design and develop products faster, with higher quality and across all platforms.
  Technologies: Figma, Figma prototyping, HTML5, CSS3, SCSS, Tailwind, Angular Material UI, Angular 20, Figma Animations and Gif Maker.
- **2D-3D Visualization (11/2023 – 07/2025)**
  3D Panel: https://www.interpon.com/in/en/color/colors-listing/filters/h_copper/
  3D Yacht: https://www.awlgrip.com/asia-pacific/colors/boat-color-visualizer
  A platform to select the perfect color for your panel and boat with instant access to the extensive database of Interpon and Awlgrip colors, users can simply choose and customize. A fully responsive Angular component designed and developed which can be integrated within any web application.
  Technologies: Figma, Figma prototyping, Figma Animations, HTML5, SCSS/CSS3, Angular 13+.

- **VIA RAIL Canada (12/2021 – 10/2023)**
  https://reservia.viarail.ca/en/booking/
  VIA RAIL is a Travel management system which helps B2C/B2B/B2E users to book and manage train tickets within and outside Canada. A fully responsive and accessible (keyboard and screen reader) web app along with B2B and B2E admin panel is built for the users.
  Technologies: HTML5, CSS3, SCSS, Bootstrap 4 and 5 (ng-Bootstrap), Angular 12+.
- **Flying Carpet (CURIO)**
  Flying Carpet is a Travel management system which helps B2C/B2B/B2E users to book and manage flight, train, cab, hotel and bus tickets. A fully responsive theme based dynamic web app and an admin panel is built with HTML5, SCSS/CSS3, Bootstrap, React JS (Reactstrap) and Node JS.
